

FOOD DEHYDRATORS for gently preserving food

Healthy & full of vital nutrients – 100 % naturally

ROMMELSBACHER

Whether fruit, vegetables, herbs, meat or fish – with ROMMELSBACHER food dehydrators you can use the oldest form of food preservation in a modern way. The humidity is gently removed from the food. Vitamins, minerals and fibre are largely preserved, the result is 100 % natural, without additives or preservatives. You can easily and safely make your own snacks that are both tasty and healthy. The possibilities are endless: fruit leather, vegetable potato chips, dried fruit, dried meat, but also treats for animals or beautiful natural decorations can be conjured up. An internal fan ensures even and consistent drying at all levels. A major advantage of these appliances, for a wide range of dehydration variations, is the adjustable temperature range of 35 °C – 75 °C with timer and automatic switch-off function. Operation is via Touch Control sensors with a clear display on the front. Thanks to the double-walled housing, there is excellent thermal insulation, which in turn keeps energy consumption low. To get started right away, the right accessories are included, such as dehydration trays, dehydration grids and dehydration mats. Whether small, full-size or XXL – these appliances are perfect for a consciously healthy diet.

Technical data:

- colour: stainless steel/black
- solid double-walled housing, stainless steel
- electronic control with Touch Control sensors
- LCD display, timer, automatic switch-off function with signal tone
- temperature adjustable from 35 °C to 75 °C, very quiet, even temperature distribution on all levels
- electronically controlled temperature regulation, overheating protection
- with individually programmable favourites program and keep-warm function
- practical recessed grips on the sides, extra-long XL cable (1.9 m)
- cord take-up, with recipe booklet
